

In Place of Privilege Management, we have Role Tree Hierarchy

## Role Tree Hierarchy

Role level	Income	P&L	Create Project	Create Affiliation	Create Roles in Affiliation	Create Event	Create Expense	Grid View	remarks
L1	x								
L2	x	<b>xx</b>	<b>xx</b>				<b>xx</b>		re-think on why not all the divisional eb; given the access?
L3	x	x	x			x	x	x	
L4	x	x	x			x	x	x	
L5	x	x	x	x	x	x	x	x	
L6	x	x	x	x	x	x	x	x	
L7	x	x	x	x	x	x	x	x	
L8	x	x	x	x	x	x	x	x	

### Privilege Management:

#### Objective :

1. Admin Privilege - Back end

#### Admin Privileges :

1. As an admin, I should be able to grant access to any single module or submodule to any user, regardless of their role. I should also have the option to select multiple users or a single user and update their access to modules. Additionally, each page or view within every single module will have custom access granted by the admin based on the user's affiliation and role. This will ensure that each user has the appropriate privileges for every page that has been developed.
2. When I access the Members Data and Affiliation Data, I should be able to select multiple members and check and uncheck their privileges simultaneously. Before submitting the privileges, I should be able to review what privileges I am updating and whom I am updating to.

**For Example :** If Project/Event is OnGoing and Simultaneously the Term Year for that affiliation is changed then So here the Volunteer(L3) will Promoted to Vice President (L2).

#### Management That :

1. Finance Management (He will Continue with the same Passbook for the transaction, Project Expenses won't get Affected)

*2. Member Management : The user will get Access for Member Management Screen to Approve the new Volunteer (L3).*

*-> Need to check the akshith document before writing the BRD for this.*

**Affiliation Member Management :**

**Member Management should be from L2-L8**

I Should be able to See My members and also Edit Their Privileges.

After I Login into my Affiliation, I Will access to Enter the Member Management,

1. I Should be able select single Member or Multiple Members and Update the *privileges for each page or view within every single module will have custom access granted.*
2. *I also need to see the*
- 3.
